

Store your Spare Spindles at the Spindle SPA

Having a spare spindle on-hand can keep your machine shop in production. But an improperly stored spindle can end up costing you if not properly maintained. Corrosion and rust from moisture in the air can cause damage to the bearings. Additionally, extended periods of sitting still can substantially compromise the bearing lubricant.

Treat your spindles to the Spindle SPA offered by Advanced Spindle Technology. Your spindle will be well cared for to ensure it's ready to go at a moments notice.

- Stored in temperature and humidity controlled room.
- 11 revolutions of spindle bimonthly.
- Ready to ship - same day service!
